

New Product - GEN2 ABS Systems and Components

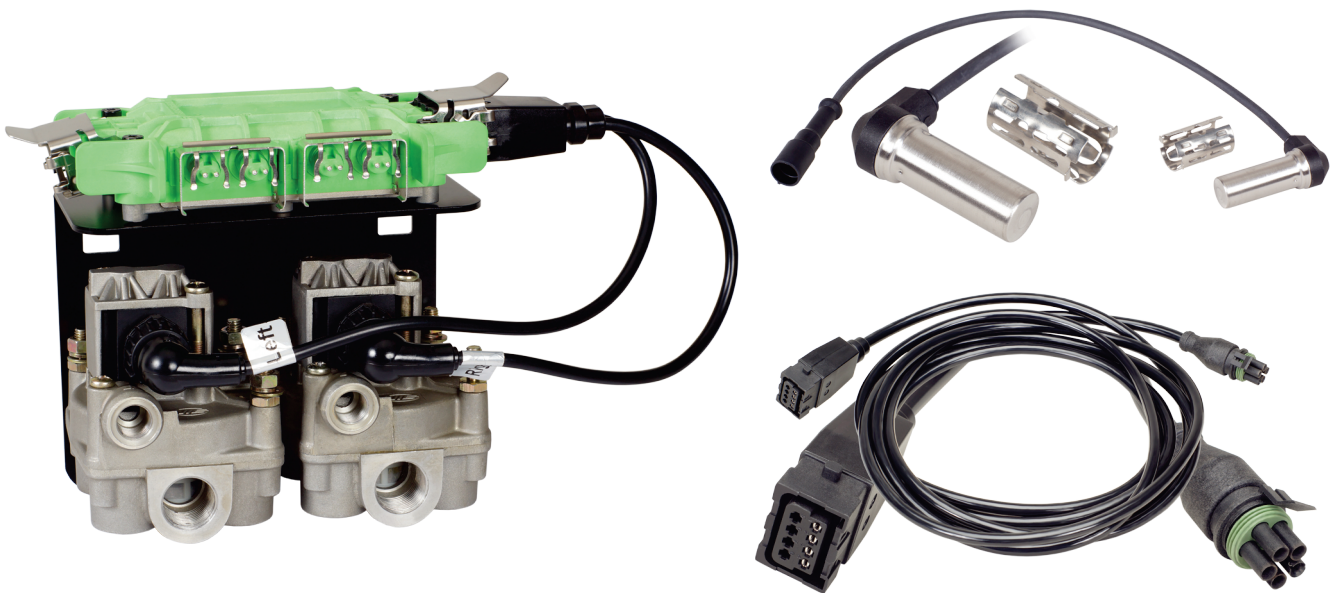

Update #2402

Attention: Dayton Parts' Distributors and Business Partners.

Dayton Parts is proud to introduce an entirely new product line to its portfolio consisting of GEN2 ABS system components. This new ABS product line consists of all ABS related components such as ECU's, Valves and Sensors that will retrofit fully with all Meritor WABCO systems. The days of spending thousands of dollars and countless hours on ABS system diagnostics are gone. The GEN2 Smart ECU is available in a 2S/1M or 4S/2M configuration and allows you to connect to your trailer via WIFI using your smartphone or tablet and does not require internet use. This streamlined process saves you time and money by pinpointing the issue and provides the part number needed to repair it. This technology has been tested, proven and even specified on OE trailer applications.

Additionally, we are also offering both Bendix® style ABS sensors and Haldex® ABS extension cables.

Upgrade your trailer with cutting edge technology by demanding GEN2 ABS system components, only available at Dayton Parts.

Dayton Parts currently offers Air Valves, Air Tanks, Air Hoses, Governors, Solenoids, Air Dryers and Cartridges. For all your Air Product and ABS needs, insist on Dayton Parts to ensure your fleet gets the quality and performance they expect.

Parts are in stock at all Dayton Parts Warehouses and ready to be added to your next regular stock order. Check on-line for pricing at daytonparts.com

Call 800-233-0899 today to place your order.
